Spring Summer 2026
made in Italy

SPRING SUMMER 2026

quality, careful selection of materials, breathability, softness, resistance and craftsmanship 100% made in Italy.

also for the Spring-Summer 2026 season tredicitredici offers a collection that is the result of the usual production coherence that distinguishes the brand.

sweater takes shape, is structured and transformed through modular games thanks to buttons (selected among the best for shape and material) that allow you to detach and reattach elements such as sleeves or sections of trousers for a versatile and playful proposal.

the colors recall the elements of nature: sand and earth alternate with intense browns, the milk color takes us back to the Lecce stones, the pastel pink smells of flowers, the rope color binds us and together with the clay everything blends into a splendid color scheme. a color palette that creates a relaxing and refined visual balance in perfect harmony with the spirit of the collection.

yarns are also special: 100% pure-organic cotton worked on a very thin 14 gauge to create plays of transparency, staggered ribs with a full-empty effect and honeycomb workmanship.

to these is added a 100% extrafine merino wool 2/60 for ultra-thin sweaters, a super mercerized cotton with a silky appearance, a linen worked with a net effect for oversized sweaters and accessories; the same workmanship with a mixed linen-cotton yarn for over-shirts or caftans.
and, again, cotton-polyamide for elasticized effects.

a collection, therefore, that is not only comfort and aesthetics, but also freedom of movement and personal interpretation

- ribbed dress with detachable sleeves **LAVINIA**
- cap with laces **LALA**
